

Policy For Lawn Watering Sewer Rate

1. This sewer rate is available at the option of utility customers who have installed lawn sprinkling systems or use water outside of buildings which is not discharged into the city's sanitary sewer system and do not wish to separately meter the water used for that purpose.
2. At the request of the utility customer to be placed on the "Lawn Watering Sewer Rate" the customer will be charged a flat monthly sewer rate determined by using the highest monthly sewer usage (in cubic feet) during the previous occupied 12 month period for that location.
3. The utility customer shall notify the city utility when they wish to transfer from the normal sewer rate to the "Lawn Watering Sewer Rate" and must also notify the utility office when they wish to transfer back to the normal sewer rate (in billing cycle intervals).
4. There will be a \$5.00 transfer fee charged to the utility customer for each change to and from the "Lawn Watering Sewer Rate".

Approved by the Estherville City Council : April 20, 1992
